THE CSS BUTTON DESIGN KIT

25 ready-to-use buttons • A visual guide for beginners

MakeButton.com | Copy. Paste. Customize.

Every button in this kit comes with **inline CSS**. That means you can paste the complete HTML into most HTML editors without depending on a separate stylesheet.

SOLID	Strong primary actions
OUTLINE	Secondary choices
NEON	Attention-grabbing highlights
3D	Tactile depth and dimension

HOW TO USE THE KIT

01 Open index.html

Unzip the download, then double-click index.html. It opens in your web browser.

02 Pick a design

Search for styles like Neon, Pill, Outline, Gradient, or 3D.

03 Copy the complete code

Press Copy HTML + Inline CSS. The code includes the button and its styling.

04 Paste into your editor

Add an HTML block or Elementor HTML widget. Paste and preview.

05 Make it yours

Edit the visible button label and the color values in the style attribute.

BUTTON ANATOMY

Small changes make a big difference. Here are the most useful style properties.

background — Button fill color or gradient

color — Text color

padding — Space around the label

border-radius — How round the corners are

border — Outline thickness and color

box-shadow — Depth, glow, or soft shadow

font-weight — How bold the label looks

A WORKING COPY-PASTE EXAMPLE

This Pink Neon example includes everything needed for its appearance.

Pink Neon

The button has a dark background, pink border, rounded shape, and a neon glow.

DESIGN TIPS

Use one main button style for your most important action. Keep labels short and clear. Make sure text contrasts well against the background. Use hover effects sparingly and check the design on mobile.
